SUMMARY

Solution architect with over 10 years of experience working in the tech industry. Started as a Java developer and made career progress up to a mid-tier developer at Accenture. On my way to becoming a Solution Architect, I was also an Application Architect experienced in developing and architecting large-scale applications for major companies in the banking, e-commerce, and loyalty sectors, which now enables me to understand and follow business goals that align with the strategy.

EXPERIENCE

LANEWAY EDUCATION – AUSTRALIA

August 2024

Information Technology Trainer

Teaching international students in the Diploma and Advanced Diploma of Information Technology (Coding) and Cyber Security Diploma. Focused on delivering core skills in programming, cloud computing, and cybersecurity, while mentoring students through hands-on, industry-standard projects.

- Developed and delivered an industry-aligned curriculum tailored to current certifications (e.g., AWS, CompTIA Security+), enhancing student job readiness by 30%.
- Led full-stack project using React.js, Node.js, and MongoDB, guiding students to build and deploy a web app, with 70% showcasing it in their portfolios.
- Facilitated practical cybersecurity sessions on ethical hacking, threat detection, and network defense, resulting in a 25% term-over-term increase in student assessment performance.

LIVELO BRAZIL

July 2019 – March 2023

Solution Architect Specialist

Design and deliver architecture solutions that bridge business needs with technical feasibility, guiding implementation from concept to production in close collaboration with the architecture team and cross-functional stakeholders.

- Led the development of a strategic integration that enabled customers to pay with Liveloo points on the Amazon Brazil marketplace, expanding Liveloo's ecosystem and driving customer engagement.
- Designed and launched a digital wallet solution that allowed users to pay with loyalty points via QR code at physical establishments, enhancing point utility and real-world usability.
- Architected Liveloo's marketplace platform, integrating with multiple partner companies to support BRL purchases while enabling users to accumulate points, strengthening partner synergy and user loyalty.

COMPASS UOL – BRAZIL

August 2016 – July 2019

Solution Architect

Provided consulting for corporate clients, engaging directly with stakeholders to understand business requirements and translate them into clear technical specifications. Actively contributed to code quality through pull request reviews and by defining scalable development patterns for the engineering teams.

- Designed and built an integration between ATMs and a client's e-commerce platform, enabling customers to make purchases directly through this new sales channel.
- Established a standardized API integration pattern using OAuth2 and API Gateway, ensuring secure, scalable, and reusable communication across services.
- Created and documented best practices for API usage and led onboarding sessions for new developers, improving consistency and accelerating team ramp-up.

ACCENTURE – BRAZIL

Software Engineering – Architect

December 2013 – July 2016

Provided consulting for enterprise clients using Java and SOA (Service-Oriented Architecture), participating in the entire development lifecycle, from initial discussions to delivery and ongoing support.

- Designed and implemented the integration of the telephone system and closed TV channel (SKY Pay TV) with major online payment platforms, enabling seamless transactions across multiple channels.
- Developed payment processing solutions for an insurance company using Oracle SOA Suite, improving system efficiency and reliability for critical financial operations.
- Conducted training programs for new integration developers on Oracle Service Bus and Oracle SOA Suite, accelerating onboarding and ensuring technical alignment across teams.
